

NEWS RELEASE

GRAPHICS SYSTEMS OFFERS uPrint™ Personal 3D Printer for Under \$15,000

Milwaukee, WI – January 27, 2009

Graphics Systems Corporation announced their partnership with Dimension Printing Group to offer the uPrint™ Personal 3D Printer. Priced at under \$15,000 and small enough to fit on your desktop, the uPrint™ is pioneering high-quality 3D printing at an affordable price. With a footprint of only 24 x 26 inches, the uPrint™ is compact, yet still delivers an 8 x 6 x 6 inch build size. The uPrint™ builds 3D models using ABSplus™ engineering-grade plastic, over 40% stronger than standard ABS plastics.

Utilizing the capabilities of 3D printing and prototyping allows users to print their 3D models for visualization, collaboration, form, fit, and functional testing. Creating a rapid prototype of designs and models allows companies to reduce time to market, decrease costly errors before production, and offers an unmatched representation of your design, creating a competitive advantage for sales and marketing groups.

Graphics Systems Corporation has provided Dimension 3D printers since their inception in 2002 and has partnered with Dimension Printing's patent company, Stratasys, to offer rapid prototyping solutions for over 10 years. Graphics Systems Corporation is an authorized Dimension sales, service, and support partner, providing Dimension uPrint™ Personal 3D Printers to the United States, as well as, Dimension's BST, SST, and Elite 3D printers to Wisconsin and Illinois.
