

GRAPHICS SYSTEMS ANNOUNCES USER CONFERENCE & SOLIDWORKS 2011 PREMIERE October 6-7 at Lake Lawn Resort in Delavan, WI

Graphics Systems Corp. announces the Graphics Systems User Conference & SolidWorks 2011 Premiere, a two-day event bringing over 35 in-depth training sessions, dozens of industry solutions, and 100's of engineers under one roof. Focusing on solutions from Dassault Systèmes SolidWorks, this unique conference features presentations on solving engineering challenges, learning the latest tips and tricks, sharing industry trends, and discovering new technologies.

Conference attendees can select from five unique tracks encompassing SolidWorks 3D CAD, Simulation, Data Management, Technical Communication, and Management. With over 35 unique sessions, both engineers and managers will leave with ideas and solutions to implement into their everyday processes to improve their products and efficiency.

To keep customers informed on the latest engineering technologies, over a dozen industry sponsors will showcase the latest in hardware, software, and services for engineers. The conference also highlights companies successfully designing innovative products with SolidWorks solutions, giving valuable insight into how companies are succeeding and overcoming engineering challenges.

“This conference addresses the issues that are most important to engineers. The goal of this event is to help customers get the most out of the solutions they use every day,” said David Kasinskas, President, Graphics Systems Corp. “Now is a great time for companies to start looking at new technologies and ideas that help solve the issues they face today. This conference will provide solutions to their issues.”

Currently Graphics Systems is running an early bird special where attendees can purchase a two-day conference pass for only \$99 before August 27, 2010.
