Graphics Systems Corporation first to pass COSMOS/Works certification test in Wisconsin and Illinois

Menomonee Falls, WI - May 8, 2003– Graphics Systems Corporation (GXSC) announced today that they are now a Certified COSMOS/Works Support Provider (CCSP). Jeffrey S. Setzer, Technical Services Manager of Graphics Systems Corporation, was the first person in the State of Wisconsin to pass the COSMOS Core Certification Test, and only the second person in the entire Midwest Region, after a gentleman working for Applied CAD-CAM Minneapolis.

The COSMOS/Works certification proves Graphics Systems' strong commitment to "Raising the Standard" for their customers. This program guarantees that Graphics Systems has met a minimum set of standards for performance and software knowledge. Customers will have the satisfaction of knowing that their users will be well trained and supported by Graphics Systems.

"Now companies get the same high level of training and support locally with COSMOS/Works for analysis as you get with SolidWorks," says David Kasinskas, President of Graphics Systems Corporation. "Graphics Systems has raised the standard in support and technical services that others try to follow. GXSC's Help Desk is a dedicated staff of professionals that are here to support your analysis solution."

Graphics Systems is dedicated to raising the bar in terms of the capabilities possessed by its clients. It is always striving to expand and improve its offerings in order to provide customers with one place to find all of the best engineering solutions.

"Since the SolidWorks model is essentially a virtual prototype, it makes sense to virtually test it up-front in the design process," Setzer states. "The insight that COSMOS analysis tools provide allows for better designs brought to market faster. There is no doubt in my mind that our customers will be using analysis tools like COSMOS to improve their bottom line as we move into the 21st century."

Graphics Systems is planning several COSMOS demonstrations and training classes in the next few months. For more information, visit www.gxsc.com.

About Graphics Systems Corporation

Graphics Systems is the Midwest's leading provider of CAD/CAM/CAE/PDM/FEA solutions for business and industry with over 10 years in business, and over 125 years of combined engineering experience. Major product offerings through Graphics Systems include SolidWorks, Cosmos FEA, SmarTeam / PDM/Works, Stratasys 3D printers and more.
