Graphics Systems Corporation signs agreement to distribute LogoPress Progressive Die Design Software for SolidWorks

Menomonee Falls, WI – October 14, 2004- Graphics Systems Corporation (GXSC), a leading SolidWorks reseller in the Midwest, will now offer LogoPress3F, a SolidWorks Gold Certified Solution Partner software used for designing cutting and metal stamping press tools with sheet metal. GXSC will sell the software throughout Wisconsin and Illinois.

Logopress computes the blank of 3D sheet metal parts. Parts can be directly designed with SolidWorks, or imported from an interface. Logopress3F handles solid parts as well as surface parts, plus bending parts as well as stamping parts. The software includes a customizable materials database, and also provides information about deformation and constraints that result from the process. Users save time by easily defining the unfolding and the unstamping of a 3D sheet metal part.

Graphics Systems will demonstrate LogoPress3F 9-11 a.m. on October 18 in Menomonee Falls, WI and on October 19 in Oakbrook Terrace, IL. For more information or to register please contact Michelle Hansen at 800-454-CADD ext. 117 or visit www.gxsc.com.

About Graphics Systems Corporation

Graphics Systems is the Midwest's leading provider of CAD/CAM/CAE/PDM solutions for business and industry with over 14 years in business, and over 125 years of combined engineering experience. Major product offerings through Graphics Systems include SolidWorks, COSMOS™ FEA, SmarTeam, PDMWorks™, DBWorks, MoldWorks, Teksoft CAM, Dimension 3D printers and more. Graphics Systems has offices in Menomonee Falls, Madison, and Green Bay, WI in addition to Oakbrook Terrace, IL. For more information on Graphics Systems Corporation, contact Michelle Hansen at 800-454-CADD ext. 117 or visit www.gxsc.com.

About LogoPress

Since 1989, the Logopress Company develops CAD software dedicated to the estimators', the tool makers' and tool designers' needs. Until today, we were providing a full 2D CAD software for design press tools in the sheet metal trade. In Europe, more than 200 users work daily with this software. Most of them work in the automotive market. Some clients employ 1 or 2 employees, others employ one thousand or more. In 2001, we decided to develop a 3D solution on SolidWorks. Obviously, our target is to transfer all our know-how into this solution and to provide the best solution in the sheet metal trade. For more information on LogoPress, contact Yves THIZY at +333 81 60 23 60 or visit www.logopress3.com.
