Graphics Systems Corporation Signs Agreement to Distribute Capvidia Software

Menomonee Falls, WI - November 26, 2002– Graphics Systems Corporation (GXSC) today announced a strategic reseller partnership with Capvidia Software of Belgium. According to the terms of the agreement, GXSC will be a distributor of Capvidia's products FaceWorks and FormatWorks in Wisconsin, Illinois, and Michigan.

FormatWorks provides tools to verify model quality in accordance with automotive standard recommendations and allows users to define their own quality criteria. Once the model quality is assessed, FormatWorks provides tools to solve frustrating data incompatibility problems occurring during the import of 3D models into SolidWorks. FormatWorks also offers automated import, repair, healing, and translation. FormatWorks features proprietary 3DVision technology and provides complementary extensions to SolidWorks.

FaceWorks combines the power of standard SolidWorks with functions designed to simplify tooling and manufacturing applications on 3D CAD models. FaceWorks uses the latest SolidWorks user interface concepts (property page) providing smooth integration into the SolidWorks environment. Users benefit from standard SolidWorks functions complemented with specialized easy to use tools simplifying the tool-making process dramatically and minimizing costs and manufacturing times.

"Graphics Systems has one of the best SolidWorks sales and support teams," said Lyle Fischer, Technical Marketing Director of Capvidia. "They have excellent training and support capabilities. They also have a very good understanding of what their customers need. We are already seeing the benefits of working together with them. Their customers will surely benefit from this relationship."

"We have had a lot of demand from our customers for programs that streamline their processes." said Dave Kasinskas, President of Graphics Systems Corporation. "FaceWorks, for example, will save a company both time and money. Any time we can provide savings for our customer by reducing significant design time, it is a win/win situation."

About Graphics Systems Corporation

Graphics Systems is the Midwest's leading provider of CAD/CAM/CAE/PDM solutions for business and industry with 10 years in business, and over 125 years of combined engineering experience. Major product offerings through Graphics Systems include SolidWorks, MotionWorks, PDM Works, Cosmos, MSC Nastran, MoldWorks, Teksoft CAM, GibbsCAM, Stratasy 3D printers and more.
